

Dear Birthparent(s),

We have the greatest respect for you and the adoption plan that you are making for your baby. We hope that you find peace in choosing a home for your child. Your courage is our hope to build our family.

We are Jenny and Bill, and we are excited about being parents. We have been married for five years and look forward to coming home to each other everyday. We have a stable home that is grounded with love, laughter and respect.

We were unable to conceive on our own and chose adoption to complete our family. Bill has two daughters. They are amazing girls. They are very excited about having a little brother or sister. Kaitlyn is 12 y/o and enjoys being with her friends, listening to Taylor Swift and playing softball. Claire is 9 y/o and is very active. She loves swimming, playing with friends and is constantly trying to perfect her bridge kick over. Claire's love is gymnastics. Both girls love to go on family vacations. We try to expose them to a variety of experiences and as many different places as we can.

Bill and I are best friends. We love being together. We enjoy kayaking, biking and traveling. We love to find new and exciting places to explore. Both of our families live in the same town and we frequently get together for cook-outs and birthday parties. Your child will be surrounded by aunts, uncles and cousins who live only a few miles away. We are very excited about bringing a child into our home. Your child will be welcomed home by two older sisters, with open arms. We intend on raising our child with openness about adoption. We believe openness will benefit the child, you and us, through letter writing, pictures and visits. We hope that you feel that we are the right couple to raise your child and we are honored that you have considered us.

Bill: I truly enjoy being outdoors, whether it be hiking, camping, grilling-out, or just working in the yard. I coach my daughter's softball team, which made it to the finals this year! After losing my father at a young age, I know the importance of family and the hard work it takes to provide for the people you love the most; the smile on Jenny, Kaitlyn and Claire's face is my reward. I look forward to the opportunity of making memories with another child. I enjoy my work as a technician in the telecommunications industry.

Jenny: I love to laugh. Laughing cures everything for me. Whether it is being with friends or a dinner alone with Bill, laughing is always involved. Bill is the funniest person that I know! I think it is very important and healthy to laugh at yourself and not take things so seriously. I have learned a lot about parenting by being a stepmother. Kaitlyn, Claire and I love to go to movies, try new recipes and play Rummy 500. I also love to read and drink coffee. I also have a passion for Zumba! I take joy in my work as a licensed social worker at a local hospital.
